"I Roughed It"

Many of us have to work hard all day long. We cannot care for ourselves as we would. No wonder our blood gets out of order, becomes thin and impure. This produces boils, eruptions, nervousness, indigestion, and great weakness.

We have this photograph and letter from Mr. John Hafter, of Wagon Wagga, New South Wales. Read carefully what he says: "I have roughed it a great deal, mining, working in storms, exposed to the heat, and have often had poor food. My blood frequently became impure and I have eruptions, boils, and become generally run down. But Ayer's Sarsaparilla takes hold of me every time, makes my blood pure and builds me right up."

AYER'S
Sarsaparilla

There are many imitations "Sarsaparillas." Be sure you get Ayer's.

Take Ayer's Pills with the Sarsaparilla. They aid in purifying the blood, and they cure constipation and biliousness.

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass., U.S.A.

CORPORATION NOTICES.

ELECTION OF OFFICERS.

At the annual meeting of the stockholders of the Hawaiian Electric Co., Ltd., held February 25, 1904, the following officers were elected to serve during the year 1904:

President.....F. W. Macfarlane.
 Vice-President.....J. A. McCandless.
 Treasurer.....Chas. Huastace Jr.
 Auditor.....H. A. Isenberg.
 Secretary.....W. L. Hopper.

The above officers also constitute the Board of Directors for the Hawaiian Electric Co., Ltd.

J. A. TEMPLETON,
Secretary.

Honolulu, February 26, 1904.

Election of Officers.

C. BREWER & COMPANY LTD.

Notice is hereby given that at the Annual Meeting of the C. Brewer & Company, Ltd., held this day, the following officers were elected to serve for the ensuing year:

Chas. M. Cooke.....President.
 Geo. H. Robertson, V-Pres. & Mgr.
 E. P. Bishop.....Treas. & Secy.
 W. F. Allen.....Auditor.
 P. C. Jones.....Director.
 Geo. R. Carter.....Director.
 Clarence H. Cooke.....Director.
 E. F. BISHOP,
 Secretary.

Dated Honolulu, February 3, 1904.

MORTGAGEE'S NOTICE OF INTENTION TO FORECLOSE MORTGAGE AND OF SALE.

IN accordance with a power of sale contained in that certain mortgage made by James H. Hakuole of Honolulu, Island of Oahu, Territory of Hawaii, to A. L. Shaw of said Honolulu, dated the 29th day of November, A. D. 1902, and recorded in the Registrar's Office, Oahu, in Liber 247 on pages 82 and 83, notice is hereby given that said mortgagee intends to foreclose said mortgage for conditions broken, to wit: the nonpayment of principal and interest when due, and upon said foreclosure will sell at public auction at the auction rooms of Jas. F. Morgan, Kaahumanu street, Honolulu, on Saturday, the 2nd day of January, A. D. 1904, at 12 o'clock M., of said day, the premises described in said mortgage as below specified.

Further particulars can be had of the undersigned or at the auction rooms of Jas. F. Morgan.

A. L. SHAW,
Mortgagee.

All of that certain piece or parcel of land situate at Kunaiahi, Kawaiaola, Honolulu, Oahu, being Apana 2 of Royal Patent No. 6764, L. C. A. No. 6247 issued to Kanaloa, containing an area of 3 68-100 Acres, and being the same premises conveyed to said mortgagee by deed of Kekualanone (W) dated the 2nd day of January A. D. 1900, of record in Liber 201, Page 333.

Dec. 8, 15, 22 and 29.

The above sale is postponed to Saturday, February 13th, 1904, at 12 o'clock noon, at the salesroom of James F. Morgan, 857 Kaahumanu St., Honolulu.

A. L. SHAW,
Mortgagee.

The above sale is postponed to Saturday, February 27th, 1904, at 12 o'clock noon, at the salesroom of James F. Morgan, 857 Kaahumanu street, Honolulu.

A. L. SHAW,
Mortgagee.

The above sale is postponed to Saturday March 26th 1904, at 12 o'clock noon at the salesroom of James F. Morgan 857 Kaahumanu street, Honolulu.

A. L. SHAW,
Mortgagee.

THE COUNT ADVISED.

Count Cassini is said to feel badly because American sentiment seems largely with Japan in the eastern question. But he should stop to consider that it is a question of the bear or the goshu.

THE YEAR AT KIHAI

The annual meeting of Kihai Plantation Company was held at the office of the agents, Alexander & Baldwin, this morning. The crop of the year was 4,546 tons. The operating expenses for the year were \$318,475.70. The following is from the report of the manager, James Scott:

A continuation of the exceptionally cold weather during the months of November and December, 1902, was experienced during the first quarter of 1903, which together with the Leaf Hopper Pest, did much damage to our growing cane, causing the great reduction that took place, in our estimated output of Sugar from the 1903 crop. To these causes for shortage on output, must also be added, the difference in surveys of acreage planted and ratooned for this crop, which in one field of 349 acres, as per original survey, and upon which surveys our estimates were based, showed an actual reduction of 32 acres. This, as in other fields resurveyed since harvested, makes a reduction of approximately ten per cent on the acreage stated in last year's report under heading "Crop of 1903."

Since the month of May, the weather on the whole has been favorable to growing crops, and our present stand of plant cane for the 1903 crop has a very promising appearance, though the good weather was rather late in coming to be of much benefit to the crop of 1903.

The Leaf Hopper Pest has almost entirely disappeared from the Plantation.

CROP 1903.

The harvesting of this crop was a continuation of the 1902 crop, for which we cut approximately 1050 acres, including the 90 acres (estimated) cane carried over from the 1902 crop, and milled with the 1903 crop, and from which we got 4546 tons of sugar. The cane of this crop took less than 7 1/2 tons to make one ton of sugar. During the months of February and March no harvesting was done.

CROP 1904.

For this we have 428 acres Plant Cane, which with 615 acres of Ratoon Cane, makes a total of 1043 acres to be milled for 1904 crop, not 1065 acres as stated in last year's report. From this acreage we had anticipated a 6000-ton crop, but owing to the large amount of our cane tasselings this season before it was fully matured, and our doubts as to the correct acreage of some of our Ratoon Fields at Camp No. 3, which have not yet been resurveyed, we are inclined to favor estimating this crop low, and we put same down at 5,500 tons.

Of the original acreage planted and ratooned for this crop we cut a few acres of our poorest Plant Cane for seed, and left out of cultivation a few acres of Ratoon Cane, which was on sandy soil, and from which we calculated the return of cane would not justify the amount of water required to bring to maturity.

CROP 1905.

Wishing to avoid as much as practicable, cutting into our growing crop for seed, a start was made planting this crop early in May, with tops from cane cut for milling, and by the latter end of July, when the harvesting of 1903 crop was completed, an area of 270 acres had been planted. At this time all available pumps were running night and day, upon which we were totally dependent for all irrigation water. At the same time the work of developing the tunnels at Station No. 3 for more water was being pushed. These conditions were prominently laid before your President, who recommended no further planting until such time as we could be assured of a better supply of water from either the work of development, or a better ditch supply, which condition was reached about the middle of October, when the development of water at Station No. 3 justified our planting 44 acres more, and which we completed in November, with tops we were fortunately able to get from the fields of tasseled cane on the H. C. & S. Co. property, then being cut back. Though this field was rather late being planted we can with reason expect a good return from it, as this is amongst some of our richest cane lands, which were planted much later in the season than this for the 1902 crop, and some of which yielded 80 tons cane per acre. This then gives us 314 acres plant cane and 647 acres ratoon cane or a total of 961 acres for this crop.

Nearly all fertilizing and hilling-up of Ratoons for 1905 crop was completed the end of January, for which work, we had the assistance of some labor that could be spared by the H. C. & S. Co.

PUMPING PLANTS.

STATION No. 1. The work done by the two Worthington 6,000,000 gals. Pumps at this station during the year has been more satisfactory than hitherto giving less trouble and doing more economical work, but, owing to the amount of grit and sand passing through the water Cylinders, during the dry seasons of the past three years, when the water level was low, the Plungers and Bushings have been so badly cut and worn as to reduce the Pump's capacity considerably. With the new Bushings now in, and the old Plungers trued up to suit, we will undoubtedly be able to do still more economical work during the coming season.

STATION No. 2. While the three deep well Pumps at this station have given more satisfaction during the past year than previously, the high cost of keeping them in repair, and the frequent occurrence of such necessity, makes this station unprofitable to work, in comparison with the steam Pumping Plants at the other two stations. We have consequently decided to keep this outfit in readiness as a stand-by only, in case of accident or stoppage to any of the Pumps at the other stations.

STATION No. 3. Since the fire of January last year, and the complete overhauling of all machinery, and erection of new buildings, necessitated thereby, this plant is today of more value than it has been at any time since its installation.

The work done by both Pumps during the past season has been good and reliable.

The 10,000,000 gals. "Reidler" Pump has done excellent work at full capacity, while the 7,500,000 gals. Risdon Iron Works Pump, though only worked up to 75 or 80 per cent of its capacity, has kept running. Rather than risk another breakdown with this Pump, which in my opinion is not built strong enough for the work it was intended for, we have decided not to run it anything over 80 per cent of its rated capacity.

Water development at this Station was stopped in October, when sufficient water had been surfaced for both Pumps at above capacity, with an economical suction. However, should we in future have a long dry summer, we can add to our already developed supply at least one million gallons more, by simply charging the holes already drilled in the rock, with giant powder, and which we calculate will open up the second of the two original wells bored at this station, but until we have the water in the pump low enough to allow of men getting into the tunnels to place the necessary charge, this work cannot be done nor will there be any need for it, until such conditions exist.

The ventilation scheme added to the equipment of this station the early part of last year, has worked admirably, while the temperature between the steam parts of each chamber is still high, the good circulation of fresh air, puts both chambers in a favorable condition for men to work in, in fact so much of an improvement over previous existing conditions, as not to be compared. Both chambers are well lighted by abundance of electric lights.

(Continued on page 7).

COMBINATION BILLIARD AND POOL TABLE

For family use. Greatest thing for keeping the men folks from "going down to the Club" at night.

We have 2 sizes 34x7 feet and 4x5 feet, with 2 & 2 1/2 in. balls. A complete outfit of balls, cues etc., (40 implements in all) is furnished with each table. Twenty six games, including various forms of Pool and Billiards, also Billiards, Golf, Tennis etc., are played on these tables and a book of rules and instructions is furnished with every table.

Sold at \$40.00 and \$75.00 on easy terms. An Ideal Home Table at a very Reasonable Price.
